

Tattvaratnāvaloka and its Vivaraṇa

Vāgīśvarakīrti

February 28, 2025

Some Conventions/Policies

- Tibetan translations are included in the apparatus when they indicate variant Sanskrit readings.
- Sanskrit renderings suggested by Tibetan appear in brackets after the translation's siglum. These renderings are hypothetical and cannot be provided in all cases.
- When two Tibetan translations differ slightly, they are separated by a semicolon. Only the second translation includes a Sanskrit rendering.
- A Tibetan translation's siglum is included when it appears to support one of multiple Sanskrit readings, based on the editors' judgment.
- Tibetan is not included in the apparatus when it offers no clear support for or against a reading.
- When both Tibetan translations of the commentary agree, they are given the siglum TV.

Some Things to Check

- Consistency in TV in rendering *vijñāna* and *jñāna*.
- Consistency in TV in rendering *itis*.

^{iv} Here one may wish to conjecture a reading such as, *anumapetyādi. anupamam ity* ... This reading is partially suggested by TV: *khyad par ji lta bu zhig dang ldan zhe na | dpe med ces bya ba la sogs pa smos te | dpe med pa ni (ni)* TV_{AD}; *dang* TV_{BG}). The corruption, if there is one, can be seen as a kind of haplography. The text nonetheless reads acceptably well with the transmitted reading (although perhaps less smoothly); thus we feel that while a conjecture is possible it is not strongly compelling.

^v The manuscript's *dharmakāyarūpitvena* is theoretically acceptable and nearly synonymous; however, *dharmakāyarūpatvena* is more expected, with forms in *rūpatvena* being vastly more frequent in Classical Sanskrit. TV's reading *chos kyi sku'i ngo bo nyid kyi* does not clearly confirm either variant, as *rūpin* in the root verse is also translated as *ngo bo*. We provisionally adopt *dharmakāyarūpatvena*, but cannot fully discount the transmitted reading.

^{vi} We need not necessarily read a compound for *āyatipathyam*, treating instead *āyati* as a locative of *āyat*. The expression appears as a gloss for *hita* in several Buddhists texts, such as in Vilāsavajra's *Nāmamantrārthāvalokinī*: *mahyam hitam maddhitam hitam āyatipathyam āgāmipariṇāmatvāt* (p. 233). Similarly, Durvekamiśra writes in his *Hetubinduṭīkāloka*: *parasmai hitam āyati pathyam* (p. 212). In

khyam tadātve pathyam⁹ cakravartitvādikam,^{vii} tasya yā prāptiḥ¹⁰

both cases, the construction is ambiguous, but in the latter case, the editors of Durvekamiśra's text have not taken it as a compound.

The word *āyatipathya* is used less ambiguously in compound by Śākyarakṣita, quoted in the following note. Similarly, the roughly parallel expression *āyatisukha* is evidently treated as a compound by Yaśomitra in his *Abhidharmakośavyākhyā*: *aihikasukhārtham apuṇyam iti. ihasukhāpekṣayā tat kṛtaṃ nāyatisukhāpekṣayety arthaḥ* (vol. 1 p. 299). Note also the contrast made with *aihikasukha*. Likewise, we can find a compounded form of *āyatiduhkha* in a verse attributed to Naradatta in the *Subhāṣitaratnakośa*: *muṇḍāpriyād āyatiduhkhadāyino vasantam utsārya vijrmbhitaśriyaḥ | na kaḥ khalāt tāpitamitramanḍalād upaiti pāpaṃ tapavāsarād iva ||* 'Who does not become miserable because of a rogue who, like a hot day, is hated by widows (? *muṇḍā*) (the hot day being hated by bald men), who leads to future pain, whose wealth expands after he expels those living with him (like the hot day manifests its richness having dismissed the spring), and who annoys his circle of friends (like on a hot day the orb of the sun is heated) (cf. INGALLS 1965: 553).

^{vii} The text is insecure here but perhaps not far from the author's intention. Where the manuscript reads *tad dāpayati pathyam* (word division unclear, *pa* and *ya* touching), we conjecture *tadātve pathyam*, following only partially the lead of TVAD. The Tibetan translations read as follows: *gang la phan pa ni ma 'ongs pa'i phan pa ste | sangs rgyas nyid la sogs pa'o || de la bde ba ni 'phral gyi phan pa ste |* (TVAD); *gang la phan pa ni ma 'ongs pa'i phan pa ste | sangs rgyas nyid la sogs pa dang | de la bde ba ni bde ba ste | 'khor lo bsgyur ba nyid la sogs pa'o ||* (TVBG). It appears that TVBG also transmits a corrupt reading with *de la bde ba nit bde ba ste*. TVAD suggests reading something that contrasts with *āyatipathyam*, for which *tadātve pathyam* fits. Another possibility is *āpātathyam*, but *tadātva* is more often used in contrast with *āyati*. See, for example, Śākyarakṣita's *Vṛttamālāstutivṛtti*: *prthagjanatve 'pi āyatipathyadarśinas tadātve ca niṣpāpāḥ* (p. 299); 'Although ordinary people, they see the future welfare and are without sin in the present moment.'

The Tibetan translations also suggest that *hita* and *saukhya* are linked with relative and correlative pronouns: *gang la* and *de la*, or *yasya* and *tasya* in Sanskrit. This does not yield good sense. It is possible that *tadātve* was misread by the translator as a correlative pronoun, while it is also possible that a second relative pronoun (*yat*) or a conjunction (*ca*) was found in the original text near *saukhyaṃ*. Here *hitasaukhya* within the larger compound is only really viable as a *dvandva*: Avalokiteśvara causes the attainment of (ultimate) welfare and (temporary) happiness for all beings. Given that, *tayor yā prāptiḥ* might be preferable to *tasya yā prāptiḥ*, but the singular is also probably acceptable in place of the dual.

⁹ *saukhyaṃ tadātve pathyam*] *conj.*; *tad dāpayati pathyam* K EDH (word division unclear); *de la bde ba ni 'phral gyi phan pa* TVAD; *de la bde ba ni bde ba ste* TVBG

^{viii} It is notable that Vāgīśvarakīrti evidently understands °prāptikāra as a *bahuvrīhi*, whereas other commentators may prefer to treat it akin to *kumbhakāra* and therefore as an *upapadasamāsa* as per *Aṣṭādhyāyī* 2.2.19 (*upapadam atīṇ*). Given the latter understanding, the expected gloss for *prāptikāra* would be *prāptim karoti*. Compounds ending in *kāra* are occasionally analysed as *ṣaṣṭhītatpuruṣas*: see, for examples, Vijñāneśvara's *Mitākṣarā* ad *Yājñavalkya-dharmaśāstra* 2.61 on *satyaṃkārakṛta*, here referring roughly to a thing 'acquired with a pledge', i.e., acquired as earnest money: *karaṇaṃ kāraḥ, bhāve ghaṇ. satyasya kāraḥ satyaṃkāraḥ—kāre satyāgadasya (Aṣṭādhyāyī 6.3.70) iti mum. satyaṃkāreṇa kṛtaṃ satyaṃkārakṛtam* (p. 275). We are unable to provide another example of a compound ending in *kāra* analysed as a *bahuvrīhi*, but we should also note that the compound *prāptikāra* is itself rare.

TV does not clearly reflect a *ṣaṣṭhībahuvrīhi* analysis, nor does it very clearly point to another reading: *de dag sgrub par mdzad po gang yin pa de la de skad ces bya'o* (TVA_D); *de dag gi rgyu mdzad pa gang yin pa de la de skad ces bya'o* (TVB_G).

^{ix} This verse is in Vasantatilakā.

^x In this case TVB_G resembles closely the Sanskrit text transmitted in K, apart from the addition of a further gloss after *vyākula*. The reading *nam par bkab pa* ('covered') doesn't yield much sense, but it could be a mistake for *nam par bkang ba* ('filled'), which is perfectly fitting and synonymous with TVA_D's *nam par khyab pa* (Negi records the latter as rendering *vipūrṇa* in some texts). One may wish to conjecture such a reading. TVA_D is significantly different here, even though most of the words of the transmitted Sanskrit text are still reflected: *du ma'i man ngag ces bya ba la sogs pa la | 'das pa dang ma 'ongs pa dang | da ltar gyi slob dpon du ma'i man ngag gi tshogs yang dag par bsdu pa'i mdun gyi dbye bas yongs su dkrugs pa ni | nam par dkrugs pas nam pa thams cad la nam par khyab pa ste | des bsgrub par bya ba dkrugs pa'o ||* The text is dubious but reflects a Sanskrit text along the following lines: *nānopadeśetyādi. atītānāgata-vartamānācāryopadeśarāśīsaṃgrāhakaiḥ saptabhir bhedaīḥ saṃkulair vyākulaiḥ sarvatravīpūrṇaiḥ taiḥ sādhyasaṃkulaiḥ.*

^{xiv} These two verses are in Indravajrā.

^{xv} An alternative to °*abhyuddharaṇakāmatā* is to read °*samuddharaṇakāmatā*. This definition of *karuṇā*, in various forms, is well known in Buddhist texts. See, for instance, Durvekamiśra's *Hetubinduṭīkāloka*: ... *duḥkhāt duḥkhahetor vā samuddharaṇakāmatā nāma yā karuṇā* ... (p. 234); or Manorathānandin's *Pramāṇavārttikavṛtti*: *duḥkhād duḥkhahetoś ca samuddharaṇakāmatā karuṇā* (edition reads *dukhā*°; p. 21).

^{xvi} One may instead wish to accept the manuscript reading *nirābhāsanirañjanaṃ*, which is understandable as a *viśeṣaṇasamāsa*. The combination of *nirābhāsaṃ nirañjanam* occurs in a verse from an untraced source cited in Raviśrījñāna's *Amṛtakaṇikā*: *yat kāyam sarvabuddhānāṃ nirābhāsaṃ nirañjanam | ajñātam a-
kṛtaṃ śuddham abhāvādivivarjitam* || (p. 19)

^{xvii} *sakalajagadarthakāri* can also be read in compound with *mahākaruṇā*°. This is reflected in TV: 'gro ba ma lus pa'i don byed pa'i snying rje chen po. Regardless, the two are evidently closely related.

^{xviii} The manuscript reading *ceti* after *dvātriṃśallakṣaṇasaṃjñakāni* appear superfluous. The commentary analyses *sallakṣaṇa* as a *karmadhāraya*, glossing *sat* with *śobhana*; *dvātriṃśallakṣaṇa* serves as a clarification of that, requiring no further conjunction. Likewise, the words *iti* and *saṃjñaka* together are redundant. In TV, the *zhes bya* following the phrase may either render *iti* or *saṃjñaka*—we find this rendering for the latter in the commentary on verse 9 for *mahāsukhasaṃjñaka*. We cannot fully discount that Vāgīśvarakīrti wrote the transmitted reading, nor can we give a clear explanation for the corruption, if it is one. Nonetheless, given that this appears to be genuine redundancy rather than simply a stylistic oddity, we provisionally conjecture a slightly smoother reading.

^{xix} Here *niṣyandaṃ* should be understood either as an accusative form (as it is in the verse) or (less likely) anomalously as a neuter noun.

^{xx} cf. *Abhidharmakośa* 2.57c: *niṣyando hetusadrśaḥ*. Vāgīśvarakīrti perhaps also alludes to Dharmakīrti's definition of yogic perception in *Nyāyabindu* 11: *bhūtārthabhāvanāprakarṣaparyantaṃ yogijñānaṃ ceti*.

^{xxi} ISAACSON (personal communication) proposes *sāksātkaraṇāvasthāyāṃ* or *sāksātkṛtyāvasthāyāṃ* as potentially superior readings to the manuscript's *sāksātkṛtāvasthāyāṃ* or the previous edition's *sāksātkṛtāvasthāyāṃ*.

In support of the former, see Vāgīśvarakīrti's *Samkṣiptābhiṣekavidhi: tadanaṃtaram ekatathatāmatena tayaiva bhinnamate tv ānaya svasaṃviditajñānasāksātkaraṇāvasthāyāṃ pūrvoktagāthayā adhyeṣitavate śiṣyāya tatpāṇau tasyāḥ pāṇim pratisthāpya* | (p. 417)

^{xxiv} In the *Dhātupāṭha*, the tenth class verbal root $\sqrt{\text{guṇa}}$ is said to express *āmantrana*. Here, however, this is a denominative verb with the sense of *āmreḍaṇa* (multiplication/repetition) formed from the noun *guṇa*.

^{xxv} The manuscript's reading of simply *sakalam* instead of *kṛtyaṃ sakalam* is asymmetrical given the following gloss, *avaśyakartavyaṃ kṛtsnaṃ*. Here TV reads simply *nges par mdzad par bya ba ma lus pa*, reflecting only the gloss and neither *sakalam* of K nor the conjecture *kṛtyaṃ sakalam*. It is also possible that *sakalam* is a mistaken scribal addition, but it's also possible that even if the Tibetan translators saw *kṛtyaṃ sakalam*, they chose not to render this because of the superfluous sounding result in Tibetan. We believe the manuscript's transmitted reading is improbable.

^{xxvii} The compound °svābhāṅganāśleṣajagadarthakāri is strictly speaking not im-
possible, and could perhaps be interpreted as an instrumental *tatpuruṣa*; howe-
ver, given that this is a prose explanation of the verse, there is no need for the
author to use such a compound and it seems more likely that the scribe left off
the *ikāra*.

^{xxviii} Something along the lines of *āsaṃsārasthāyi sākṣāt kriyata iti* may have dro-
pped out of the text here given TV, but there is no very compelling reason to
think that it did. The additional words are relevant, given that it is a pertinent
feature of the first *sādhyā* that it remains active for as long as *saṃsāra* continues
to exist. We can be reasonably sure that TV reflects *āsaṃsārasthāyi* with 'khor

section.

^{xxx} Normally *bshad ma thag pa* in Tibetan has the sense of *anantarokta*, but here the translator probably did intend it to render *upadeśānantaram eva* as we find the same rendering later in the paragraph.

^{xxx} The understanding offered by TV, which reflects *asphuṭaṃ* instead of *sphuṭaṃ*, appears to indicate a misunderstanding on the translator's part, confusing the word division of *kṛtvā sphuṭaṃ*. It is not possible for *sphuṭikṛtaṃ* to take an accusitive object, nor is a form such as *sphuṭikṛtya* possible without larger changes to the text.

Sanskrit reading, but it does convey a different sense. Whereas the Tibetan seems
to say that the *sādhyā* 'is taught to be a good quality', the Sanskrit suggests the
meaning 'which has the previously mentioned qualities'.

^{xxxv} This conjecture follows the Tibetan translation, with the reading in K being difficult to account for. See, for instance, a similar expression in *Siddhaikavīrasā-dhana* (author unknown): *tato niḥsṛtaraśmibhir ā pādatalād vālāgraparyāntapṛptaṃ bhāvyaṭe* (*Sādhanaṃālā* no. 67, vol. 1, p. 67); *de las byung ba'i 'od zer gyis rkang pa'i mthil nas skra'i rtse mo'i mthar thug pa khyab par bsgoms te* (Tōh. 3461 fol. 116r). ADD REFERENCE

^{xxxvi} TO CHECK: TVA_D appears to be defective here, with different readings in De-
rge Koyosan and Delhi. TVA_D: *ba spu'i rtse mo'i mthar thug par gyur pa'o ||* (*gyur pa'o ||*) Koyosan; *gyur ba'i Delhi* [MW23703]. TVB_G: *ba spu'i rtse mo'i mthar thug par yang dag par gang bar gyur pa'o ||*

^{xxxvii} TV is perhaps ambiguous and may not reflect a different reading of the Sa-
nskrit if *thog ma dang tha ma med pa'i* is understood to qualify *rang bzhin* instead
of *ngos po*.

^{xxxviii} The compound beginning *anantaprabheda*° is challenging to unpack and not entirely secure in its reading. K transmits the compound in a way that includes either the word *arati* or *ārati*, neither of which can reject *prima facie*. TVA_D suggests reading *rati*, while TVB_G has no reflex of the word but may be corrupt, given that it sounds rather incomplete. TVB_G is also missing a reflex of *bhedā*, although it does have one of *pra* from *prabheda*, also indicating corruption. The term *animittarati* or *mtshan ma med pa'i dga' ba* does occur in Jñānapāda's *Samantabhadrasādhana: animittarativiśuddheḥ samastadevīgaṇasvabhāvaṃ tat* | (122ab; reconstructed in SACCONI and SZÁNTÓ 2023: 261); *mtshan ma med pa'i dga' ba rnam dag pa* | *ma lus lha mo'i tshogs kyi ngo bo nyid* || (Tōh. 1855 fol. 34r5; the translation in Tōh. 1856 by Smṛtijñānakīrti poses some problems and need not be dealt with here); 'Because of purification by signless pleasure, that [awareness] has as its nature the group of all goddesses.' This parallel does lend support to reading *animittarati*, but the context is technical and esoteric, so some caution is due.

As for the analysis of the compound, while various possibilities may be entertained, the main ambiguity is whether *anantaprabheda* qualifies *animittarati* or *paramānanda*. An analysis on the basis of the former could read: *anantāḥ prabhedāḥ yasya sānantaprabhedānimittaratiḥ, tatsvarūpasya paramānandasyopabhogah, taddvāreṇa*. Of the Tibetan translation, while TVA_D renders all words found in the Sanskrit text as constituted in some form, it is hard to interpret if one does not remove or modify various instrumental and genitive particles. From *rūpavajrā*° up to *sambhujyamānaṃ*, TVA_D reads: *gzugs rdo rje la sogs pa nas* | *sgrol ma'i mthar thug pa'i lha mo'i tshogs kyi mtshan ma med pa'i dga' ba'i rang gi ngo bo'i rab tu dbye ba dpag tu med pas mchog tu dga' ba la nye bar longs spyod pa'i sgo nas* | *gzugs brnyan dang 'dra bas yang dag par longs spyod pa*. TVB_G has the same readings, apart from the two suspected lacunae mentioned above.

^{xxxix} E_{DH} misreports K as reading *paripāvanārtha*.

lengthy discussion of this position the author later uses the more expected term,
'nirvṛtti', which is not metrically viable here.

^{xliii} This verse is in Śālinī metre.

^{xliv} The syntax of TV suggests reading *karuṇāsaṃvalitasya*: 'gags pa'i 'khor lo las
snying rje'i rang bzhin can sems can gyi don ('gags pa'i] TVB_G; 'gog pa'i TVA_D)
However, *karuṇāsaṃvalita* naturally qualifies *cakra* and not *sattvārtha*.

^{xlv} Here one may wish to emend to *sātasaṃpūrṇaṃ cakraṃ* to avoid the *karma-*
dhāraya, given that the author did not previously use a *karmadhāraya* when refe-
rring to this (e.g., *maṇḍalaṃ sātasaṃvalitam*). Nevertheless, such a *karmadhāraya*
is not in any obvious way out of the normal scope of Vāgīśvarakīrti's usage.

^{xlvi} It is possible that *kṛtvā sthātavyam* was missing from the original text or from
the version of it consulted by the Tibetan translators; alternatively, it is possible
that the translators simply didn't feel it was necessary to explicitly render. The
agent of *sthātavya* can be understood to be the unspecified *sādhaka* who is al-
so the agent of the gerunds earlier in the sentence. Although a genitive of the
causative of *√sthā*, *sthātavya* here has no object that is specified apart from the
sādhaka himself: i.e., he should make himself rest or establish himself in a state
by doing what is described. The construction is frequently used in the *Hevajra-*
tantra, such as in 2.3.44: *satataṃ devatāmūṛtyā sthātavyaṃ yoginā yataḥ*; '... for
the *yogin* should always establish himself/remain with the form of the deity.'

^{xlix} TM_D's reading *rab tu mi rung phyir* is suprising, given that the commentary,
presumably executed by the same translator, reads *rab tu grub pa nyid* [*kyl phyir*].

¹ This verse is in Śālinī metre.

^{li} TV indicates that the text may have included a compound analysis of *prajñā-jñāna*, but if so, it is unclear what kind of compound this analysis signifies. If it is for a *karmadhāraya*, we would expect the TV to read as it does elsewhere for such analyses, with something like *shes rab kyang de nyid yin la | ye shes kang de nyid yin* (cf. the commentary on 5cd). The reading in TVB_G is probably corrupt after *phyis te: byang chub* appears to have been moved from the following clause with *bodhicitta* to this clause. Perhaps the text should read *phyis te rdzogs pa'i dus so || gang zhe na* |. Taken altogether, TV suggests the translator may have had a different reading here, but no compelling emendation is indicated.

^{lii} TV reflects basically the same words as transmitted in K but with an understnading that may reflect a different underlying reading. Whereas the Sanskrit text as transmitted in K appears to suggest primarily one thing that would be *vyartha* on this position—namely, *sarvaprayāsa* taught by the *tathāgatas* that is characterised by repeated *anuṣṭhāna* directed at meditations on mantras and so forth. TV, on the other hand, seems to understand two items that would be *vyartha*: namely, *sarva-prayāsa* and *sgrub pa'i mtshan nyid*, probably *anuṣṭhānalakṣaṇa*: *gang gi phyir sngags dang phyag rgya dang | lha nyid la sogs pa'i rnam pa bsgom pa la yang dang yang du 'bad pa dang | gzhan yang de bzhin gshegs pas gsungs pa'i sgrub pa'i mtshan nyid don med pa thob par 'gyur ro ||* 'Because it would follow that repeated effort in meditation ... and, what's more (*gzhan yang*; Skt. *ca?*), what is characterised as practice taught by the *tathāgatas* would be useless'. This understanding is made more noteworthy by the manuscripts reading the dual *tathāgatoktau*, but that may be just coincidental given the understnading reflected in TV is not very compelling on the level of overall sense.

^{liv} *Samājottara* 113f

^{lv} The referent of *tat* in *tadrūpaṃ* is evidently *caturtham*. TVB_G essentially reflects the transmitted Sanskrit reading but *eva*, if it is rendered by *nyid*, is slightly out of place.

^{lvi} E_{DH} emends *niruttara* to *nirantara* stating that this reading is *bhoṭānusārī*, but the situation in TV is slightly more complex. The transmitted Sanskrit suggests reading a string of adjectives starting with *anāsrava* that qualify *pravāhitva*. Here reading *nirantara* and *avicchinaprabandha* would lead to redundancy. TV instead renders a series of abstract nouns before *pravāhitva*, with TVA_D including something reflective of *nairantarya* (*bar ma chad pa nyid*). Both versions of TV lack a reflex of *niruttara*.

pa'i dngos po, which looks like a corruption for TVB_G's *mtshon par bya ba dang*
rather than anything indicative of a variant reading in the Sanskrit.

^{lviii} Although K reads *aneneti*, and TVB_G also reflects this with 'dis, by normal
conventions the *anena* here would indicate that the word being glossed, *lakṣyaṃ*
in this case, denotes the agent of action, and this is clearly not the case. While the
pronoun can potentially refer back to *prajñājñāna*, it is also an easy scribal slip.
The pronoun is not reflect in TVA_D.

^{lix} TVA_D adds near the beginning of this sentence *Samājottara* 113ab: *abhiṣekaṃ*
tridhā bhedaṃ asmin tantre prakalpitaṃ |.

^{lx} There is little doubt about the meaning of the text here, but its constitution
is not very secure. Both Tibetan translation suggest that the whole of *Samājo-*
ttara missing 113f was cited. While TVA_D offers a somewhat cleaner text, TVB_G
again may reflect something closer to K, with a pronoun immediately following
iti and the word 'caturtha' marked off by an *iti* on its own. Various proposals
could be entertained for a smoother Sanskrit text, but what K transmits can be u-
nderstood: '[Objections]: But there exists (*asti*) a word (*pada*) for that (*tat*) [fourth
initiation]—namely, this (*etat*): “the fourth [is that again like that]”’

^{lxi} After rendering *upadeśasaṃrakṣārthaṃ* (*man ngag bsrung bar bya ba'i phyir dang*), TVAD has apparently suffered from an eyeskip and resumes with its translation of *pratipādayiṣyamāṇatvāc ceti*.

^{lxii} Here TVBG quotes again the entire *pāda* of *Samājottara* 113f. This is an undesirable reading: It is specifically the words *tat punaḥ* that indicate the Buddha real intention of speaking of *caturtha*, not the entire *pāda*.

^{lxiii} Tib. discusses two further *pakṣas* here: that the fourth referred to in *Samājottara* 113f is the four *aṅga* of *sevā* and so forth; and what appears to be the idea that the fourth initiation consists in the third accompanied by its fruits (*'bras bu dang bcas pa*). Of these the first is rejected on account of its rendering cultivation meaningless, and the latter is rejected as *siddhasādhana*.

^{lxiv} K's reading *arthasyaikasya* is problematic. At face value, it would mean 'a single external object', whereas the argument is clearly concerning all external objects. Even if the meaning of *eka* were strained and taken in the sense of 'unitary', the following reason would become tautological. Emending *ekasya* to *eva* is also compelling based on the TV, which clearly reflects an *eva* with *nyid*.

^{lxv} TVAD finishes the clause ending *pradhānatvāt* with a *rdzogs tshig*: *gtso bo nyid yin pa'i phyir ro*. This creates an incomplete sentence with the clause pointing ne-

ither forwards nor backwards, since the clause ending in *nirākṛtatvāt* also ends with *phyir ro*. The translation may be corrupt, or perhaps the translator was uncertain about how to construe the clause. Here the reason should probably point forward: although it does support the non-primacy of external objects, enough reasons have been given to support their general non-existence, and the primacy of awareness in the Vijñānavāda and Madhyamaka positions can be seen as a basis on which the *lakṣya* could be accepted as *jñāna*.

^{lxvi} Here and at the end of the next paragraph, TV renders *citrādvaita* as *shes pa gnyis med*, as if reading *cittādvaita*. The more expected rendering is *sna tshogs gnyis med*.

^{lxvii} TVB_G presents this argument differently than what is transmitted in Sanskrit but maintains logical flow: *don (rnam pa) de dag kyang med pa'i phyir shes pa'i ngo bo nyid kyang med yin na | de ji ltar rnam pa dang bcas pa ma yin zhe na |* 'Because those objects [i.e., *ākāras*] also do not exist, the nature of cognition too cannot exist. ^{lxviii} (TO EXPAND AND REORGANISE) Here 'on te in TVB_G isn't a strong reflex of ucyate, but like ucyate it does explicitly mark a change in pakṣa. The ucyate ending the previous sentence may be suspect. A similar formulation was used in the previous paragraph: *tat katham nāstīty ucyate?* There TV reads: *ji ltar med ce na* | (TVB_G); *de ci ltar med ces brjod* | (TVB_G). Here, for *tat katham tad asti paramārthata ity ucyate*, TV reads: *de ji ltar na don dam par grub par yod pa zhes bya zhe na* (TVA_D); *de ji ltar na don dam par yod par grub pa zhes bya* | (TVB_G). From this it is difficult to draw firm conclusions, but *ces brjod* and *zhes bya* probably more strongly point towards *ity ucyate* rather than simply *iti*.

^{lxix} TV changes the subject of the sentence from *vijñāna* to the *ākāras* of *vijñāna*. TVA_D is likely corrupt with *shes pa rnams ni* in place of TVB_G's *shes pa'i nang na*.

^{lxx} Both Tibetan translation exhibit various degrees of corruption and/or confusion here: *cung zhig kyang log pa'i rnam par ngo bo ni snang ba'i phyir ro ||* (TVAD) *cung zhig dang log pa'i rnam par 'khrul pa'i ngo bo mi snang ba'i phyir ro ||* (TVAD). There is a possibility that *log pa'i rnam pa* reflects *mithyākāra* instead of *mithyāpratibhāsa*.

^{lxxi} *Abhisamayālaṅkāra* 5.21; *Ratnagotravīghāga* 154; *Pratītyasamputpādahṛdaya-kārikā* 7; etc.

TV may reflect also the inclusion of an *api* somewhere in this sentence given the particle *yang* (e.g., *sukhādyākāraṃ api*). Here again TVBG as altered the argument slightly: *bde ba la sogs pa'i rnam pa yang rnam pa dang bcas pa'i shes pa kho na la dmigs pa yin te |*; 'Forms such as pleasure too are perceived with only a cognition that has forms.' TVAD is closer to the Sanskrit syntax: *bde ba la sogs pa'i rnam pa'i shes pa yang rnam pa dang bcas pa kho na la dmigs pa kho na yin te |*; 'Cognition too that has the forms of pleasure and the like are only perceived to be none other than [cognitions] with forms.'

^{lxxiv} E_{DH} appears to understand the text as saying that both *bhāvanā* and *saka-
lajagadarthakriyādinām vyavasthā* are established. TV renders *bhāvanā* in the
third case, suggesting it may have been seen outside of the compound or seen
within the compound but understood as having a *ṭṛtīya* relationship with *saka-
lajagadarthakriyā*. We understand a compound beginning with *lakṣyalakṣaṇa* up
to *sakalajagadarthakriyādinām* providing a list of that for which the *vyāvasthā* is
still established in the Madhyamaka system.

Again K seems to transmit a superfluous *iti*, here following *sidhyati*.

^{lxxviii} An alternative conjecture for where K reads *yadarthasvā'yam* could be *yadarthas tavāyam*, but we see no reflex of a *tava* in the Tibetan translations: *rtsom pa 'di'i don gang yin pa* (TVA_D); *gal te gang gi don du (bzhi pa bshad pa'i bshad pa'i dus) 'di brtsams pa'i* (TVB_G).

^{lxxix} TV may suggest a different reading (which cannot easily be guessed at), or it may simply elaborate on what is found in the Sanskrit text: *de yang gtaṃ gzhan du thal bas brjod pa'i phyir | gang du song ba mi shes so zhe na |*; 'And (yang) because you have spoken (*brjod pa*) by moving on to (*thal bas*) other topics (*gtaṃ gzhan*), where that (*de*) [main topic] has gone is not known.'

guḍa and *gorasa*, capable of doing both harm and good, does not becomes an object of service/devotion, even if he is omniscient' (ed-s p. 37). On this Yamāri comments: *bu ram dar ba byed pa po || zhes gsungs te | 'di rigs pa dang mi rigs pa 'dres pa la grags pa yin no ||*, '... this is known as "mixing what is appropriate and not appropriate"' (Tōh. 4226 fol. 12v6–7). Sāṃkrtyāyana records a marginal note in his manuscript on the term: 'lohitā (?) *guḍakāraḥ*, *guḍagomayakāra* ity apekṣyate.'

The author of the *Vādarahasya* uses the term as well: *atadrūpaparāvṛttanilā-kārātanmātragrahaṇam iti vyavasthāyām nāpi viśayasārūpyam, (tadabhāvān) kā hi paramārthasadalikarūpayoḥ samānarūpatā nāmetyādi guḍagorasayor ekatāka-raṇam kvopayuktam | bādhakapratyayād dhi tadalikatvam kiṃ prāgāropya cintā kriyate śeṣaś ca doṣo 'bhimānasyaiva cintyatvādityādir ajatapatitiparāmarśād ga-taḥ |* (p. 73–74); 'In the system where there is grasping to more than just a blue form that excludes what is not of that nature, there is not even similarity to the object (because of its absence [?]). For what indeed could be the so-called similarity between what is ultimately real and what is unreal? Given this and similar [arguments], how is the unification of *guḍa* and *gorasa* useful?' The context here appears to be a refutation of the view that conceptual cognitions include both a universal and a real object.

Although it is evidently not a widely reference 'nyāya', the general idea seems to be that these two substances represent the appropriate and the inappropriate (or the useful and the useless), and that they should not be mixed. Precisely what substances, then, *guḍa* and *gomaya* refer to are then difficult to determine, as molasses and milk seem like a harmless combination.

^{lxxx} TV suggests reading: *kevalasyānupalabdheḥ rucyabhāvāc cakrākārasaṃvalitasyānupalabdheḥ sākṣāt kartum aśakyatvāt*. The addition of *anupalabdheḥ* after *kevalasya* renders the flow of logic less smooth and makes *sākṣāt kartum aśakyatvāc* superfluous. TV also adds the reason '*bad pa mtshung pa'i phyir*' ('because the effort is equal'), which is a fitting argument: although according to this system only bliss is meditated on and achieved, this actually requires the same amount of effort as the systems that include deity forms.

^{lxxx} Where we conjecture *na ṛtīyasya kalyāṇabhāvaḥ*, TV reads: *gsum pa dge ba ma yin te*. The *kalyāṇatā* in the following paragraph is rendered with *legs pa*. There too an abstract noun with another noun in the genitive case is not reflected, but such syntax would in any case be less natural in Tibetan. The reading of (either a silent emendation or a misreading of the manuscript), *na ṛtīyaḥ kalpanābhāvaḥ*, gives some sense ('the third is not without conceptual construction'), and for this we must supply a masculine headword such as *pakṣa*. There are other options to emend K's reading, such as *na ṛtīyasya kalyāṇatā* or perhaps *na ṛtīyasya kalpanābhāvam*. Note that *kalyāṇatā* in the following paragraph was also copied in K with a dental *na*.

^{lxxxii} TVA_D conveys a different meaning here: *de la 'ga' zhig las rigs pa cung zhig cig brjod par mi bya ste* | It is possible that this sentence is corrupt (especially the *las* after *'ga' zhig*).

^{lxxxiii} TV differs substantially in the second part of this sentence: *de srid du 'bad pas yang dang yang du bsgoms pa'i phyir dang | thams cad du bsgom par bya ba dngos po nyid du yod la* | (TVA_D); *de srid du 'bad pas yang dang yang du bsgom pa'i phyir thams cad du bsgom par bya ba'i dngos po yod do* || (TVB_G). Of these, the intention behind TVA_D is hard to discern, but TVB_G can be translated: 'For that long, because one repeated meditates with effort, the object of meditation remains.' Here the meaning is not compelling and indicates corruption or mistranslation.

^{lxxxiv} The sequence of the argumentation is off in K, with *iti cet* and *nanu* being added to two sentences that represent the *siddhāntin*'s speech. Here the current *siddhāntin* (probably equal to the author himself) is arguing against the criticism just expressed about the fourth *sādhya*.

One can consider using the word *atha* instead of *nanu* in the sentence beginning *nanu aprapañcaṃ śīghram eva*, and one can also consider ending it with *iti cet*, which may have accidentally been moved to the preceding sentence, and which may have a reflex in TVB_G with *zhe na*. The flow of argumentation is somewhat less clear and certain in TVA_D, which ends the sentence with *'di khyad par yin te*. Although *iti cet* is not strictly necessary here, what follows is certainly a response, attempting to show that a lack of *prapañca* does not in fact lead to stability more quickly. This is clear from the conclusion: *tasmān nāyaṃ viśeṣaḥ*.

^{lxxxv} *Pramāṇavārttika*, Pratyakṣapramāṇa 285. The reading *bhāvanābalaniṣpattau* is supported by the Tibetan translation and occurs in other sources (*bsgom pa'i stobs ni rdzogs pa na*). The more mainstream reading for this *pāda* is *bhāvanāpa-riniṣpattau*.

Apart from other minor differences, TV_{A_D} adds *spros pa la dmigs pa ni* at the beginning of the sentence. ^{lxxxvii} Both Tibetan translations lack a reflex of *nīrasatvena*, but there is otherwise reason to assume the word to be an interpolation. While TVB_G otherwise agrees with K, TVA_D suggests a different structure to the text here: *dgos pa la sogs pa gsum pa'i phyogs la bshad pa'i nyes pa dang | gsang sngags kyi tshul gyi rim pa med pa'i phyir; prayojanābhāvādītr̥ṭīyapakṣoktadoṣatvān mantranayakramābhāvāc ca*. It is true that *prayojanābhāva* was an argument given against the third *pakṣa*. Here, however, if that argument is further qualified with *nīrasatvena*, its inclusion as a different reason is cogent—unlike the fifth *pakṣa*, the third includes bliss as an integral part of the *sādhyā*.

^{lxxxviii} TV perhaps misinterprets *sāksātkaraṇāt pūrvam* rather than reflects a different reading with *sngar mngon du byas pa'i phyir* (*sngon* is corrupted to *sngon* in) ('before, for the sake of direct experience').

^{lxxxix} Both TV translations treat this section quite differently and may or may not suggest different underlying readings: *bden te | bsgrub par bya ba 'bras bu mngon du gyur pa'i gnas skabs de yang rim pa 'di la med pa dang | mngon du gyur ba yongs su btang ba dang | dgos pa ma mthong ba'i phyir ro ||* TVA_D; *bden te | bsgrub par bya ba 'bras bu mngon du gyur pa'i gnas skabs na de yang rim pa 'di la med pa dang | mngon sum du gyur pa yongs su btang ba la dgos pa yang ma mthong ba'i phyir ro ||* TVB_G.

The word *sāksāt* could be taken with *parityāge* as K and E_{DH} suggest, but the point is not so much that the *krama* is directly abandoned but that, according to this *pakṣa*, it is not directly present when the direct result is directly experienced. This Vāgīśvarakīrti sees as rendering the *sādhyā* pointless.

^{xc} TV an alternative structure to the sentence: *lṅga pa'i mtha'i rab tu dbye ba rtog pa'i dri mas stong pa ma yin no* || (no] TVA_D; te TVB_G); *na pañcāntaraprabhedāḥ kalpanākalaṅkāśūnyāḥ*.

^{xcī} TV lacks a reflex of *icchākāle dṛśyate*.

Both translations add an extra sentence to this paragraph: *rang gi 'dod pas ('dos pas TVB_G; 'gog par TVB_G) 'gog pa yang mi nus te mi mthun pa med pa'i phyir | sdug bsngal la sogs pa 'gog pa 'dod kyang sdug bsngal la sogs pa la 'jug pa mthong ba'i phyir ro* || 'And it cannot be stoped by one's volition because [volition alone] is not discordant with it. For, although they may desire to stop suffering and the like, it is observed that people continue to engage in suffering'.

Given the Tibetan text, it is possible there is an omission between *vyāpakam vā* and *icchākāle*. The words *icchākāle dṛśyate* are strictly speaking not necessary in this sentence, but they are also not inappropriate: according to this position, it is *icchā* that is the occasion for the cessation of the *maṇḍala*.

^{xcii} Where K reads *dāruṣaṅghāt pravjalito* we conjecture the compound reading *dāruṣaṅghātaprajvalito* on the strength of *maṇḍalacakraprajvalitaḥ* below. TV renders both compounds somewhat freely and does not clearly help in deciding the matter.

^{xciii} TV a fuller sentence here. TVB_G reads: *de ltar dkyil 'khor gyi 'khor lo stong pa nyid kyi ye shes kyi me rab tu 'bar bas mngon sum du byas nas kyang | dkyil*

TVA_D appears to be slightly more corrupt, but suggests roughly same text: *de

du byas nas kyang | dkyil 'khor gyi 'khor lo ma lus par ldog par byed la | de yang

^{xciv} TV diverges significantly in this section: *'di ltar de la shing 'gyur bar byed pa'i

TVA_D is again mostly the same text with a few more minor corruptions: *de la
'di ltar shing 'gyur bar byed pa'i rgyur gyur pa'i me ni shing gi 'gyur ba yang dag
par skyed pa nyid kyi shing 'gyur bar byed pa ni me yin no zhes 'jig rten pa rnams

Although K is also quite corrupt in this paragraph, it is difficult to see how
the text it transmits corresponds to the Tibetan translation. It is also not obvious
what Sanskrit potentially lay behind this Tibetan translation. TVB_G can be rende-
red into English as follows: 'To explain, in [the example], fire, as the cause of
transformation in wood, creates a transformation in wood, and by this common
people believe that fire transforms wood. In this case, however, emptiness is not a
cause for a transformation in the *maṇḍala*. Therefore, one cannot say that this [e-
mptiness] is a cause of cessation, nor that emptiness will cease of its own accord.'

^{x cv} TVB_G reflects closely the Sanskrit text transmitted in K, but TVA_D diverges significantly start from *tena nivṛttiś: de nyid kyis ldog pa ni 'gal ba'i phyir la | rgyu'am khyad par byed pa med pa de bas na stong pa nyid kyi ye shes la ldog pa med do || de bas na dkyil 'khor gyi 'khor lo yang stong pa nyid kyis ldog go zhes bya ba yang ma yin te* |. Given that the syntax and logic of the passage is far from clear, the translation has probably suffered corruption in a number of places (e.g., *khyad par* for *khyab pa* and possibly *'gal ba'i phyir* for *'gal ba med pa'i phyir*).

^{x cvi} Here again TVA_D diverges from K significantly, and transmits a text that is not easily comprehensible: *stong pa nyid la ldog par byed pa yin pa | log pa dang stong pa nyid kyis ldog par byed pa yin no zhes su zhig smra* |

^{x cvii} TV does not reflect the Sanskrit of K for this sentence: *bla ma'i man ngag las kyang stong pa nyid dang | de ldog pa las ma gtogs pa'i ldog par byed pa'i tshad*

stong pa nyid kyis ldog par byed pa ma yin ldog pa'i tshad ma cung zhig kyang
yod pa ma yin pas* (TVB_G). Again TVA_D appears corrupt and barely cohrenet.
TVB_G is more understandable (reading *stong pa nyid kyi* for *stong pa nyid kyis*):
'From a guru's instruction there is not even the slightest means of knowledge
for a terminating factor that is not a the terminating factor that is emptiness;
therefore, ...'; *gurūpadeśato 'pi na kiñcit śūnyatānivartakavyatiriktam nivartakam
pramāṇato 'sti*.

The overall meaning conveyed by TVB_G is fitting for the context here, whereas K's
reading doesn't seem to work. We can arrive at a similar meaning by conjecture
nivartakam in place of *na*. It is possible that the Tibetan translators saw a similar
reading but were unable to translate literally (or misunderstood) *iti yatkiñcid etat*.

^{xcviii} This sentence too appears differently in TVA_D: *ldog pa'i snying po med pa la
rtog pa dang ldan pa rnam kyis brtags pa dgos pa yod pa ma yin no ||*; 'There is no
need for reflective people to examine insipid cessation.'

^{xcix} The pronoun combination *ye te* can have the sense of "whatever there may
be" (SPEIJER 1886: §287). In this case, Prajñākaramati in his *Bodhicaryāvatārapa-
ñjikā* interprets them as conveying the sense of inexpressibility: *ye te iti teṣām
eva anubhavasiddhatvād idaṃtaya kathayitum aśakyāḥ* (p. 341).

^{ci} The conjecture *ciranīrutasyāpi* ('long-silent' or 'long-since mute') is paleo-
graphically closer to K's *cirutasyāpi*, though TV's suggested *ciramṛtasya* ('long-
dead') offers a less ambiguous example.

^{cii} TVA_D varies significantly for this paragraph and is again not readily under-
standable: *rnal 'byor pa'i byin gyi rlabz kyiis nam mkha' las kyang dngos po'i ngo bo
'das pa'i 'khor lo las sems can gyi don byed pa yin la | nam mkha' ni ma yin te | de'i
ngo bo nyid ma yin pa'i phyir ro ||*

^{ciii} From *yathā sattvā°* to *sambhavaḥ*, TV is significantly different: *ji ltar sems can
gyi don byed pa de las byung ba med pa de bzhin du don byed pa'i 'khor lo yang de
la mi srid do ||* (TVA_D); *ji ltar sems can gyi don byed pa de las 'byung ba med pa de
bzhin du 'khor lo yang de las mi srid do ||* (TVB_G)

It is likely that both translations reflect *tato* in place of *tattvato*, but it is unclear what this pronoun would refer to. The reading *tattvatas* can be understood in the sense that accomplishing the aims of beings does not manifest spontaneously from the nature of reality, nor does the *cakra*; hence, this position cannot explain how the *cakra* and hence *sattvārtha* are made to restart after cessation.

^{civ} The reading of K, *punaḥ svecchayā svecchetpādanam*, suggests that a word dropped after *svecchayā*, and TVB_G supplies a fitting word ('gog / *nirodha*). Surprisingly TVA_D lacks a reflex of *svecchayā nirodhaḥ*, but without this the text does not sound complete: *yang dang yang du rang gi 'dod pas skyed par byed pa nyid yin la; punaḥ puunaḥ svecchayotpādanam*. This perhaps represents a reading that was an early corruption in the textual transmission.

appears to be intransitive in greater frequency.

[E_{DH} p. 149] gambhīraśūnyam pratibhāsamātram śāntātīsūkṣmam

^{cx} Although not entirely certain, the commentary, by separating the first three words into a compound, may suggest reading *svapnendrajālaiḥ* instead of *svapnendrajāla°*.

^{cxi} TV lacks a reflex of *upamā* in *upamābhidheyair* (*mngon par brjod pa yis*) as well as in the commentary when translating *upamābhidheyair upamāvācakair* (*mngon par brjod pa ni smra ba pos*).

^{cxii} This verse is in Upajāti metre.

^{cxiii} Strictly speaking the text is not incorrect as K reads without *iha*, but its absence here is striking given that it is found in the root text and that it is important in precisely conveying the intended meaning.

śrīsamāje parā yasya bhaktir niṣṭhā ca^{cxviii} nirmalā |
tasya vāgīśvarasyeyaṃ kṛtir vimatināśinī³⁰⁰ ||

^{cxiv} From *ghabhīra*° to *nirañjanādi* TV reproduces the root text.

^{cxv} One can either read °*gaganagarbhavyāpi* in compound with *saptaprakāra*° or as qualifying *puṇya*. It seems likely that the author intended this ambiguity.

^{cxvi} It would appear that *nirmij* (or *nirmit*) is *metri causa* for *nirmimat*.

^{cxvii} This verse is in Mālinī metre.

^{cxviii} Given the position of *ca*, it seems that we should take *niṣṭhā* as a substantive rather than an adjective qualifying *bhakti*. TV, somewhat unnaturally, reflects understanding *niṣṭhā* as an adjective meaning ‘perfected’ by rendering it *mthar phyin pa*.

^{cxix} The slight rearrangement of word order, from °kṣīratārā° to °tārākṣīra°, corrects the metre of the verse, which is Mālinī. Note, however, that TV perhaps reflects K's word order: 'o ma skar ma lta bu (TVA_D); 'o ma lta bur skar ma lta bu'i (TVB_G).
